Re: Constellation NewEnergy's Comments Unbundling Investigation [ICC
Docket No. 03-0582]

Dr. Schlaf:

In response to the two questions posed in the Notice of Request for Comments, which was dated October 3, 2003, Constellation NewEnergy ("NewEnergy") believes that no additional delivery services should be unbundled at this time. Furthermore, NewEnergy believes that no further unbundling of metering or billing services is necessary at this time.

Having stated the above, NewEnergy believes that such notice regarding additional unbundling of delivery services should be issued on an annual basis in order to ensure the proper development of a competitive market.

Lastly, NewEnergy requests that a conference bridge be established for the prehearing conference scheduled for the morning of Wednesday, October 29, 2003. Please advise if this is plausible.

Thanks very much.

Regards,

Katie Papadimitriou
